

We are pleased to provide you with more detailed information about our Flight Pass product.

First a little background. The EuropebyAir FlightPass was launched in the U.S. in the spring of 1998 with nine European based airlines participating in the program. The program now includes more than 20 airlines and covers 170 cities in Europe.

The program was designed to make traveling within Europe easy, fast and affordable.

The Flight Pass makes it easy to travel within Europe because each FlightPass is an "open" ticket that can be used for any one-way flight on any of the participating airlines' valid routes.

The Flight Pass makes it fast to get around Europe because passengers can travel to the far corners of Europe at jet speed.

The Flight Pass makes it affordable to travel within Europe as each flight costs U.S. \$99 (plus tax) regardless of the length of the flight.

This is the first in a series of links that describe our company's features. Each successive link describes our program in complete detail. Please open the files and print the attachments in sequence for Training purposes.
