

FINAL DOCUMENTS

1. We provide you with a ticket jacket that explains How the Flight Pass Works. Of special importance is that passengers are:
 - a. Advised to call and reconfirm their reservations 72 hours in advance as European airlines do change schedules frequently, especially when Daylight Savings Time changes.
 - b. Advised to allow for extra time at the airport as taxes are to be paid at the Sales desk prior to check-in.
 - c. Includes Terms and Conditions
2. Standard airline ticket stock that is processed through BSPs and the IATA Clearing House is not used for the FlightPass product. We instead created a FlightPass document that is accepted by the participating airlines. More details on advance purchase and settlement are available separately. When you have been provided with FlightPasses, you print the FlightPasses on a normal printer showing the passenger's name, valid dates and participating airlines. Because Passes can be used on any airline and changes are allowed in the FROM/TO boxes, these fields are left "open". Flight reservation details and/or an invoice should be provided separately and not printed on the Flight Pass itself.
3. A list of Participating Airline Reservation Numbers will be provided as a MS Word document that can be used by passengers when traveling in Europe to make or change reservations by calling the airlines directly.

Reserved Airline Reservation Numbers in Europe
